PROFESSIONAL SUMMARY

Computer Science and Engineering student with hands-on experience across the full stack — Node.js/PostgreSQL backend work in a live internship, plus independent projects integrating real-time APIs and a regression-based machine learning system. Comfortable across the JavaScript/React/Node stack and Python-based data work, with a strong grounding in data structures, algorithms, and OOP. Seeking a Software Engineer Internship.

SKILLS

Languages: Java, Python, JavaScript, SQL

Web Development: HTML, CSS, React, DOM Manipulation, API Integration, Responsive Design

Backend & Databases: Node.js, PostgreSQL, REST APIs

Cloud & Tools: Google Cloud Fundamentals, AWS, Git, GitHub, VS Code

QA & Testing: Manual Testing, Functional Testing, Regression Testing, API Testing, Postman

Core CS Concepts: Data Structures, Algorithms, OOP, DBMS

EXPERIENCE

Full Stack Developer Intern — HindCare

July 2026 – Present

- Building HindCare, a hospital and ambulance aggregator platform, developing the patient-facing emergency booking flow along with hospital and ambulance fleet partner onboarding and admin approval workflows.
- Developing a Node.js REST API covering hospitals, ambulances, bookings, and a stateful chatbot, plus the booking lifecycle logic (requested, assigned, on route, completed or cancelled).
- Designing the PostgreSQL database schema and building frontend views across 4 user roles (patient, hospital, fleet, admin).

Tech Stack: HTML, CSS, JavaScript, Node.js, PostgreSQL

PROJECTS

Know Weather — Weather Forecast Web App

June 2026

- Built a weather forecast web app that lets users search for a city and view temperature, feels-like temperature, humidity, wind speed, and wind gust details.
- Integrated a weather API, handled dynamic data using JavaScript and DOM manipulation, and designed a responsive interface for quick weather checks across different screen sizes.

Tech Stack: HTML, CSS, JavaScript, Open-Meteo API, DOM Manipulation, Responsive Design

Live Demo: <https://manishh28.github.io/Know-Weather/>

Auto Oracle — ML Web App

May 2026

- Built a machine learning prediction system to estimate used car prices from key vehicle features.
- Cleaned and preprocessed data (missing-value handling, categorical encoding) using Pandas, then trained a regression model to power instant price predictions through a simple web interface.

Tech Stack: Python, Pandas, Machine Learning, Data Preprocessing, Regression Model

EDUCATION

Bachelor of Technology in Computer Science and Engineering

Expected 2027

JECRC University, Jaipur

CERTIFICATIONS

Google Cloud Computing Foundations Certificate — Google Cloud — Nov 2025

Quality Assurance — freeCodeCamp — June 2026

Python — freeCodeCamp — June 2026

JavaScript — freeCodeCamp — June 2026
